

LETS GO

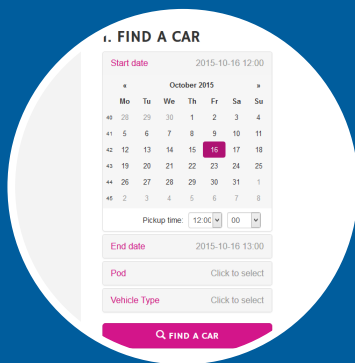

CARSHARE SYSTEM

LetsGo Carshare System is a 2-way Carsharing System where you get a flexible and efficient system for managing your fleet. As an administrator the key functions are:

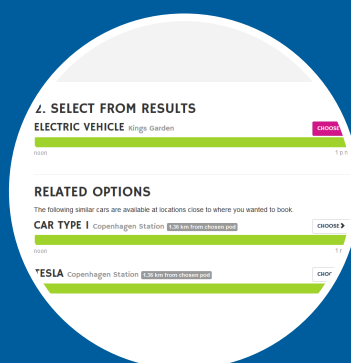

- User management
- Efficient fleetmanagement
- Usage statistics
- Billing and accounting

USER MANAGEMENT

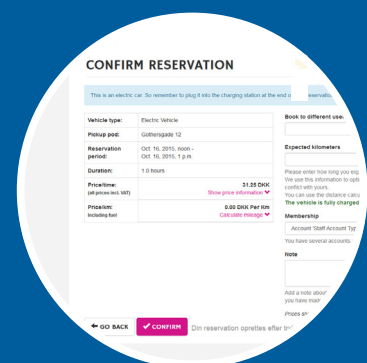

LetsGo Carshare System offers a variety of tools to handle user accounts. It is easy for new drivers to set up accounts. Different accounts can be set up for each member and the system can handle from household accounts to big company accounts with many members.

EFFICIENT FLEETMANAGEMENT AND REPORTS

You get an excellent overview of your fleet, with the possibility of making adjustments to optimizing the use of the fleet. Among other features the system offers map view of where you members are located, in order for you to manage your fleet. It is possible to generate all the reports you need to organize your fleet efficiently. LetsGo Carshare System also gives the opportunity to organize your fleet in car pools. This can optimize your fleet with up to 20% compared with a conventional booking system.

BILLING AND ACCOUNTING

Our accounting system let you manage your billing, payments, campaigns, and penalties. Our in-house developers are constantly adding new features and we offer customization of the system to your wishes. Further, we offer extensive training and operational support. LetsGo Carshare System can be used both with and without hardware installed in the cars. Beyond our own HW system FerrumBox, LetsGo CarShare System is compatible with most other HW systems i.e. Convadis. You can try out a demo version at: demo.letsgo.dk.
